

TRANS CHEM

STOCKFEED – PRODUCT FOCUS

Trans Chem is the exclusive distributor of Pancosma in Australia. Pancosma have been researching, developing, producing, marketing and selling essential innovative animal nutrition products and concepts for over 65 years.

Pancosma products optimise the production of high quality and safe foods by improving animal nutrition through the use of appropriate and well-proven feed additives.

Organic Minerals

What is B-TRAXIM?

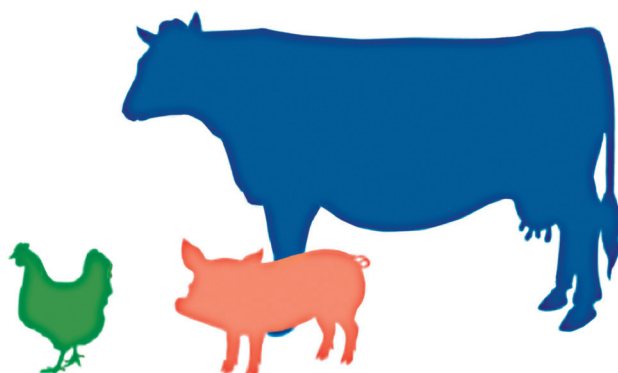

Completely water soluble GLYCINATES that improve absorption and mineral status of animals.

Designed for optimal use in both PREMIXES and COMPLETE FEEDS.

Why use B-TRAXIM?

Using glycine as organic ligand, allows for:

- Better bioavailability than proteinates
- Higher mineral concentrations than proteinates = more cost effective!
- 4 forms: Zinc (26%); Iron (22%); Copper (24%); Manganese (22%)

Unique glycinate

- ✓ 100% organic
- ✓ A specific polymer form with a high mineral ratio
- ✓ A crystalline form in powder for high stability in premix, feed and in the gut
- ✓ An excellent solubility in water at varying pH
- ✓ High metal percentage

Superior efficiency

Unique technology

- ✓ Accurate and homogeneous particle size
- ✓ Dustless, odourless and free flowing
- ✓ Ideal for mixing, easy to handle
- ✓ Low moisture content
- ✓ Good resistance to heat and humidity
- ✓ Trial results with pigs, poultry, ruminants available
- ✓ Increase in feed efficiency, higher body weight gain, improved health of animal, performance improvements
- ✓ Disease prevention

Product Focus: XTRACT 6930 – Performance Boosters for Sows & Poultry

What is it:

XTRACT 6930® is a proven formula of microencapsulated cinnamaldehyde, carvacrol & capsicum oleoresin standardized active substances. These substances are naturally occurring in aromatic plants and spices and have been selected for their proven effects in monogastric animals via extensive scientific research.

Need to know (Sows):

- ✓ Gut Effects: Xtract 6930 increases digestive secretions and improves feed digestion
- ✓ Improves gut microflora balance and helps to ensure better disease resistance
- ✓ Xtract 6930 improves sow fertility
- ✓ Improved feed nutrient utilisation
- ✓ Xtract 6930 improves piglet growth and piglet weight at weaning

Need to know (Poultry):

- ✓ Improves Body Weight Gain, Feed Conversion Ratio increases
- ✓ Broilers: Decreases Breast Moisture Loss = Better Carcass quality
- ✓ Increases Enzymatic Activity and Promotes Feed Digestion; improved gut health and balance
- ✓ Improved disease resistance, reduction in mortality giving improved profitability

Product Focus: CMO-TEK 6161

What is it:

CMOTek 6161 is a unique flavouring palatant manufactured using Iso-Fusion™ technology. CMO Tek 6161 is especially suited for young animal feeds, milk replacer and complementary feeds for calves, lambs and piglets.

Need to know:

- CMO Tek 6161 adds a strong, consistent and attractive smell of milk and vanilla to the feed
- Improves palatability and animal feeding behavior and appetite especially in young animals
- Dustless, Free Flowing & Highly stable
- Homogenous microparticle size ensures CMO-Tek 6161 is easily dispersible in all types of feed thanks to ISO-Fusion Technology
- The stability of the flavor is optimized by the addition of a retaining agent to protect the flavor from the heat and thereby preventing loss of aromatic compounds

Trans Chem also carries a wide range of other Pancosma palatants suitable for all animal species – contact us for more details.
