

Over 50 years using top quality Calf and Fish Skin that are **the highest in Type I collagen**

Collagen makes up to 30% of the protein in the human body, playing a vital role in protecting the function of organs and tissues. Several scientific studies have shown that the daily consumption of collagen has a regenerating effect on joint cartilage and bones and acts as an elasticising agent and antioxidant for the skin.

## Advantages

- 95% - 99% protein
- High in Type I collagen
- Highly bioavailable
- Lower molecular weight
- Neutral taste and smell
- No bitter aftertaste
- Highly soluble
